GOALS

Hard-working and responsible. With clean personal and professional goals. In love with programming and technology and its influence on people. The dynamic environment of the world of programming offers challenges to those who I face with total passion. Enthusiastic about blockchain technology and dApps, along with Iota's directed acyclic graph. Eager to learn and strengthen myself professionally.

WORK EXPERIENCE

Senior frontend developer

Inneo Innovative Technologies SA

November 2022 - Present

Senior frontend developer

Ecovium

October 2021 - November 2022

I worked as a web developer mainly focused on the frontend performing the following tasks:

Competences:

Development of IOT applications from scratch developing PWA's with Angular +v11. Maintenance of applications already created. Implementation of communication in real time with GraphQL. Development of application testing systems with Cypress, Jest among others. Contact and business meetings with the client in an international environment. Mentoring to different colleagues more junior. Technical interviews with incoming colleagues. I work in a multidisciplinary, multilingual and international environment.

- Angular, Angular PWA, Ionic
- SCSS, CSS3, JS ECMA 5,6, React.
- Spring Boot, ExpressJs + GraphQL.
- PrimeNg, Cypress, Jest, Jasmine.

Technologies used:

Angular **GraphQL** **NgRx** **Vanilla Javascript** **Webpack** **HTML/SASS** **Docker/Docker-compose**

Senior frontend developer

Aratech

August 2021 - Present

In this company I started my adventure as a senior developer for the first time, with more responsibilities than ever and also in a much more dynamic and above all international environment, dealing with clients from all over the world with challenging projects and ideas!

Competences:

During my still short stay at Aratech I developed as a professional in IOT projects, logistics management and especially international projects with a bilingual environment.

- Creation from scratch of IOT projects and definition of structure.
- Training and technical interview with new teammates.
- Responsive development and mobile first.
- Version control and CI / CD.

Technologies used:

Fullstack MEAN engineer

PFS Group

August 2020 - August 2021

If in the previous company I started my adventure as a software developer, in this one I grew and continue to grow exponentially. I am in charge of maintaining several of your projects, and starting others from scratch. of front using technologies such as Angular, RxJS, ES6-Beyond JS, among many others along with backend technologies like NodeJs, with frameworks like Loopback3 / 4 and I am also in charge of the deployment of containers with Docker + Docker Compose and other DevOps tasks.

Competences:

During my time, I developed several competencies in different internal and external projects.

- Maintenance of legacy projects with old frameworks.
- Development of totally new projects from start to end.
- Responsive & user friendly development.
- Version control and CI/CD.

Technologies used:

Angular NodeJs Vanilla Javascript Webpack HTML/SASS PostgreSQL MongoDB Java Docker/Docker-compose Jenkins Loopback

Junior web developer

Geinfor SL

March 2019 - August 2020

The development of an ERP is a laborious job, learning is assured as professional progression. In Geinfor I took my first steps as a programmer and more specifically in the front, developing in the latest technologies such as Angular 9, Node, Ts, Rxjs, Git, HTML5, SCSS and agile methodologies with SCRUM.

Competences:

During my time in this company I learned in a forceful way the correct use with Angular and the better work methodologies, which have subsequently served me in later professional positions.

Technologies used:

Angular NodeJs Vanilla Javascript HTML/SASS/Typescript PostgreSQL MongoDB Java

Bussines accountantman & manager

ITV Xativa

2015-2017

I performed office automation tasks, cash flow control and financial accounting, apart from processing documentation and vehicle reforms.

- Management of personal vehicle documentation.
- Use of all available office tools.
- Business accounting and cash flow.
- Management of vehicle reforms.

SKILLS

Frontend

Angular (+2 years)
