GOALS

Diligent and responsible with clear personal and professional objectives. Passionate about programming and technology and its impact on individuals. Thriving in the dynamic environment of programming, I tackle challenges with utmost passion. Enthusiastic about blockchain technology, dApps, and Iota's directed acyclic graph, I aim to learn and advance professionally.

WORK EXPERIENCE

Senior Frontend Developer   INEO Innovative Technologies SA

November 2022 - Present

I continued my journey as a Senior Frontend Developer, refining my skills within a Swiss environment and its work methodology. I gained insights into diverse testing methods, the development cycle, and the significance of code quality.

Competences:

Execution of a multitude of Swiss projects, including projects for insurance companies, national lotteries, and social security.

- Leading projects from inception through the entire development cycle.
- Conducting code reviews for colleagues and ensuring functional code.
- Ensuring quality and stability by implementing various unit and end-to-end tests across all participated projects.
- Working in an international environment following Swiss/German work methodologies.

Technologies used:

`Angular` `Rxjx` `NgRx` `NgXs` `Rx Workspace` `HTML/SASS/JS` `Cypress` `Jest` `Docker/Docker-compose` `Spring Boot`

Senior Frontend Developer   Ecovium

June 2021 - November 2022

It was my first experience as a Senior Frontend Developer, embracing the changes and novelties that came with the role. I was responsible for both development tasks and mentoring junior colleagues.

Competences:

During my tenure at this company, I worked on several international projects, particularly for a renowned German automotive company.

- Development of IoT applications from scratch, crafting PWAs with Angular +v11
- Mentoring junior colleagues and conducting technical interviews for incoming team members
- Creation of application testing systems using Cypress, Jest, among other tools
- Engaging in business meetings and liaising with clients in an international setting

Technologies used:

Angular GraphQL NgRx Vanilla Javascript Webpack HTML/SASS Docker/Docker-compose

Fullstack MEAN engineer
PFS Group

August 2020 - June 2021

If in my previous job I embarked on my journey as a software developer, here I grew and continue to grow exponentially. I oversee the maintenance of several projects and initiate others from scratch. On the front end, I use technologies like Angular, RxJS, ES6-Beyond JS, among others, and in the backend, I employ technologies like NodeJs with frameworks like Loopback3/4. Additionally, I handle container deployment using Docker + Docker Compose and other DevOps tasks.

Competences:

During my time, I developed several competencies in different internal and external projects.

- Maintenance of legacy projects with old frameworks.
- Development of totally new projects from start to end.
- Responsive & user friendly development.
- Version control and CI/CD.

Technologies used:

Angular NodeJs Vanilla Javascript Webpack HTML/SASS PostgresSQL MongoDB Java Docker/Docker-compose Jenkins Loopback

Junior web developer
Geinfor SL

March 2019 - August 2020

The development of an ERP is a laborious job, learning is assured as professional progression. In Geinfor I took my first steps as a programmer and more specifically in the front, developing in the latest technologies such as Angular 9, Node, Ts, Rxjs, Git, HTML5, SCSS and agile methodologies with SCRUM.

Competences:

During my time in this company I learned in a forceful way the correct use with Angular and the better work methodologies, which have subsequently served me in later professional positions.

Technologies used:

Angular NodeJs Vanilla Javascript HTML/SASS/Typescript PostgresSQL MongoDB Java

SKILLS

Frontend

Angular (+5 years)

React (+1,5 year)

JavaScript (+5 years)

Ionic (+1,5 year)

HTML/CSS/SASS/LESS (+3 years)

Backend

Python (+1 year)

Node.Js + frameworks (+2 years)

PHP (+6 months)

Java + frameworks (2 years)

Others

IA & Big Data | Clean code | Blockchain | DevOps | Code revision | Git | Unitary testing | Cypress | Unit testing | CI/CD | Native/Mobile
WordPress

EDUCATION

Specialization course on Big Data & IA
IES DR LLUIS SIMARRO - XATIVA
2022 - 2023

Development of cross-platform applications (DAM)
IES DR LLUIS SIMARRO - XATIVA
2017 - 2019

Company administration & accounting
IES DR LLUIS SIMARRO - XATIVA
2013-2015

AWARDS

🏆 **Best academic expedient**
Best academic record of the year 2022-2023, obtaining an ursurpassed average of 10 over 10 in the training course.

🏆 **Best academic expedient**
Best academic record of the year 2019-2020, obtained by an unsurpassed average grade of 8.6 in the training cycle higher (DAM).

🏆 **Artic Code Vault Contributor**
Emitted by Github.
